

"GLOWING" CHALK ART

Make art that looks like it's glowing!

To check out our video tutorial, visit the
Mooreville Public Library's Virtual Program page:

<https://tinyurl.com/mplvirtual>

What you need:

Included in your packet:

- Black or dark construction paper
- Cardstock shape
- Chalk
- Cotton swabs (optional)
- Paper towels for cleanup

Directions:

Note: this project may be messy, so you can put down newspaper or go outside to contain the mess.

1. Cut out the shape you would like on white cardstock (shamrock is printed, but you can draw and cut out anything you like).
2. Hold the cardstock shape firmly on the black page.
3. Draw a thick line of chalk around the shape.
4. Leaving the shape in place, use your finger or a cotton swab to smudge the chalk outward away from your shape. Go slow and smudge out to the edges of your paper.
5. Wipe your hands on paper towels between colors.
6. Take your paper outside to gently blow or shake off excess dust if needed.
7. Carefully lift off the shape to reveal your design. Blow off the excess pastel dust outside and use a cotton swab to clean up any smudges on the inside of your shape.
