

7th Grade

BACK ROW: Paul Beasley, Jack Rooker, Charles Bain, Jimmy Hadley, Ivan Whitlow, Clifford Mann, Ronald Arvin, Jimmy Martin, William Murray, Harold Weddle, Robert Nevins, Boyd Nowlin, Robert Hagee, Marvin Swinney, Gene Lockhart, Jimmy Hart.

SECOND ROW: Mrs. Van Liew-Sponsor, Chester Cordray, Ted Rigdon, Roy Kinnett, Ronald Parks, Charles Clark, Bob Smith, George Antrim, John Ragsdale, David Renner, Bruce Smith, Dale Almond, Jim Cox, Kaydon Haught, Billy Koehnlein, Mr. Bowman--Sponsor.

FRONT ROW: Nancy Losh, Norma Hughes, Wilma Wrightsman, Shirley Spangle, Della Poe, Marilyn Rairdon, Anna Gay King, Vernell Wilcher, Tina Bea Huff, Harlene Giffin, Betty McHaffie, Marilyn Hensley, Marcia Lewis, Betty Mae Welsch, Carol Poe, Nila Jo Rusie, Myla Dee Rusie, Donna Wise.

Newby Faculty

FRONT ROW: Cecile A. Rainbolt, Dorothy Ragsdale, Martha Copeland, Mary McKamey.

BACK ROW: James R. Cox, Dorothy Pieper, Dollyne Pollock, Texa Smith, Earl W. Warriner.

The Newby Building was added to our campus in 1936 and 1937 when we who have attended this school for twelve years began our education. Some of our first-grade papers were laid in the cornerstone of the building. It was given the name "Newby" in memoriam of William and Milton Newby, two brothers who left a part of their estate for the furtherance of education in Mooresville.

A black and white photograph of a still life arrangement of various objects, including a clock, a hammer, a ruler, books, and a comb, set against a dark background. The objects are scattered and overlapping, creating a sense of depth and texture. The clock at the top left shows the time as approximately 10:10. The hammer is positioned vertically on the right. The ruler is placed horizontally in the center. The books are stacked and fanned out, with titles like 'HYGIENE AND HOME NURSING' and 'BIOLOGY' visible. The comb is placed horizontally in the center. The overall composition is a classic still life study.

History of M. H. S.

The founding of this institution began in 1860 when the Friends built the old Academy building to provide religious and educational training for their children. However, in 1870, the school board organization, which had been formed a few years prior to this at Sam Moore's Store, bought the building from the Friends.

This organization continued the school similar to the former way. They appointed Professor Jehu Stuart as the principal and Miss Rebecca Trueblood as the teacher. Their subjects were limited to the three R's—readin', 'ritin, and 'rithmetic.

As the town grew and the school developed, more ground was needed to provide room for expansion, so the Board purchased the territory back of the Academy.

Year after year the demand grew for a greater improvement in school; more room was needed and more teachers. At the same time the town was growing and more children were attending school. So the high school building was added and more advanced studies introduced.

Then the home economics building and the gymnasium were added to provide training for home-makers and recreation for the student body.

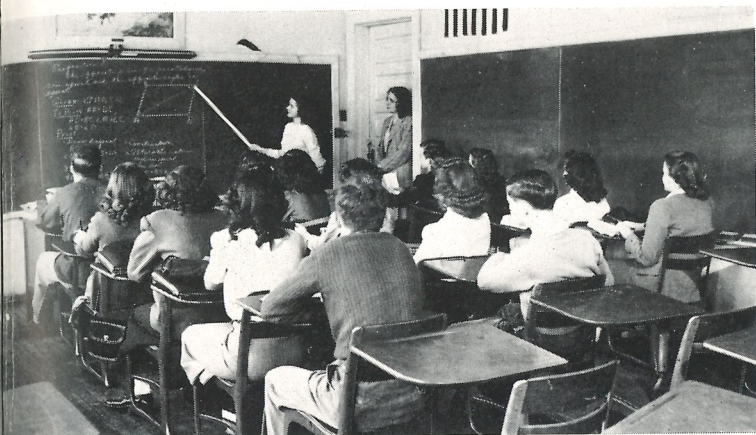

In 1936 and 1937 the Newby building was added to the Mooresville campus in order to accommodate the increased enrollment in the grade school.

Slowly but surely our school has developed until we have a grand institution. We boast of one of the most beautiful campuses in Indiana. We feel fortunate in having a widely varied curriculum, offering probably the greatest variety of subjects than does any school of this size.

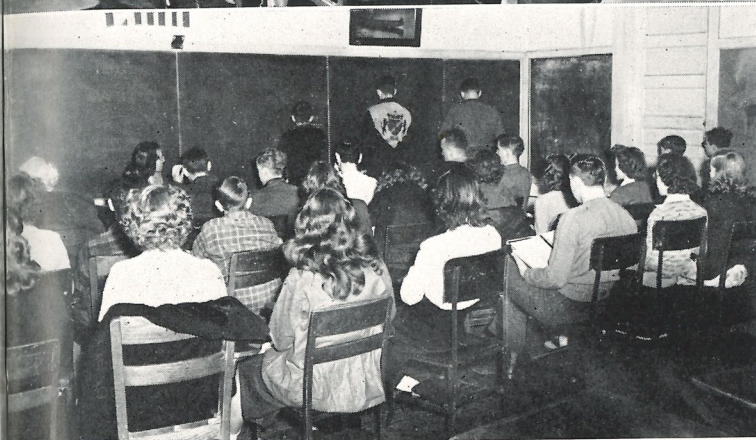

Several hundred students have entered to "grow in wisdom" and have gone away having obtained an abundance of basic knowledge.

Mathematics

Math, that subject covering everything from " $2+2 = 4$ " to " $a^2+b^2=x(x+y)^2$ ", has had devoted to it a most complete and well-rounded out schedule here at M. H. S. Since a good math background is most essential in everyday life, as well as in specialized business, a large number of students are enrolled in these classes.

Geometry — Miss Ragsdale instructs the geometry class which consists mostly of sophomores who learn "all the angles."

General Math — This practical course teaches students the whys and wherefores of everyday math problems.

Algebra — Mrs. Van Liew is shown at the board assisting one of her freshman algebra students.

TYPING I — We have three beginning typing classes. Mrs. Eggleston and Miss Dailey are instructors.

ADVANCED SHORTHAND — Miss Dailey directs the advanced shorthand class which is composed of seven senior girls whose main goal is speed.

BOOKKEEPING — Mrs. Eggleston teaches bookkeeping. The students enjoy the practical experience obtained in this class.

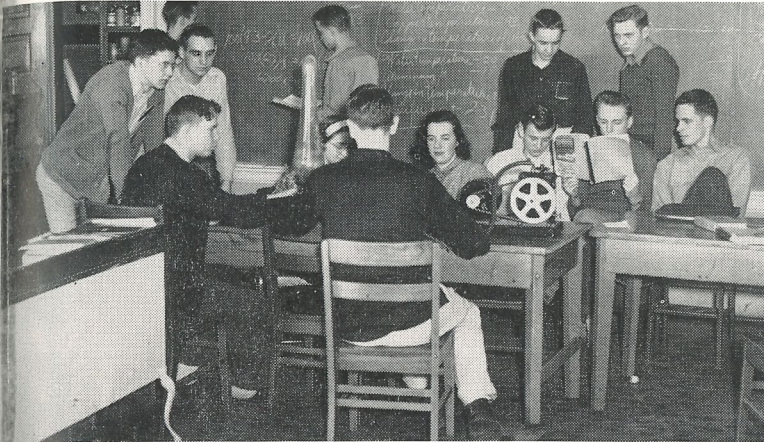

"Take a Letter Please"

The Commercial students have helped the teachers by typing tests, study guides, and the school paper, "Campus Crier". They also help in the office by typing letters and office forms.

The Commercial Course consists of shorthand I and II, typing I and II, general business and bookkeeping.

Science vs. M. H. S.

The aroma that reaches our nostrils from the lower hall is not always pleasant. However perhaps from the basic knowledge received in these science classes may come some wonderful and useful discoveries or inventions in the years to come.

PHYSICS — Some say it is really difficult but it's not for those who appreciate and enjoy science. Mr. Truax teaches this class.

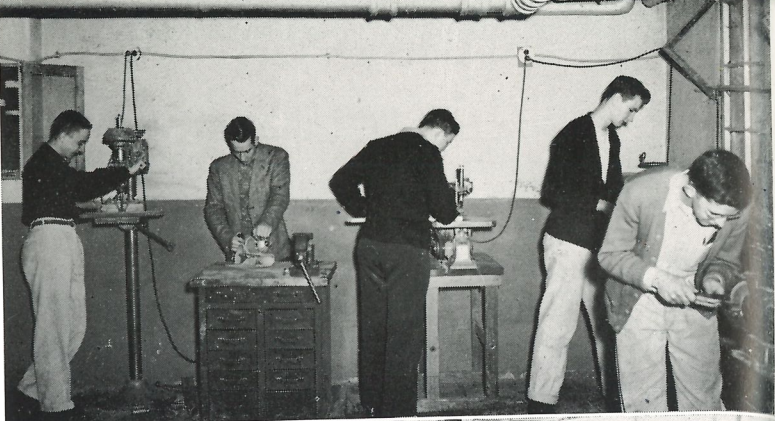

BIOLOGY — Under the instruction of Mrs. Hassan this class has received basic knowledge of science and nature in general.

CHEMISTRY — This class enjoys experiments and studies which help them delve more deeply into the mysteries of science. Their teacher is Mr. Finke.

SHOP — Under the supervision of Mr. Truax the boys have taken home many well-made articles to prove their progress in this department.

AGRICULTURE

— This department is directed by Mr. Bowman. They have had a very interesting year of excursions, farm testings, and lectures.

PRACTICAL ARTS

— For practical experience this department acts as a repairman for odd jobs around the school.

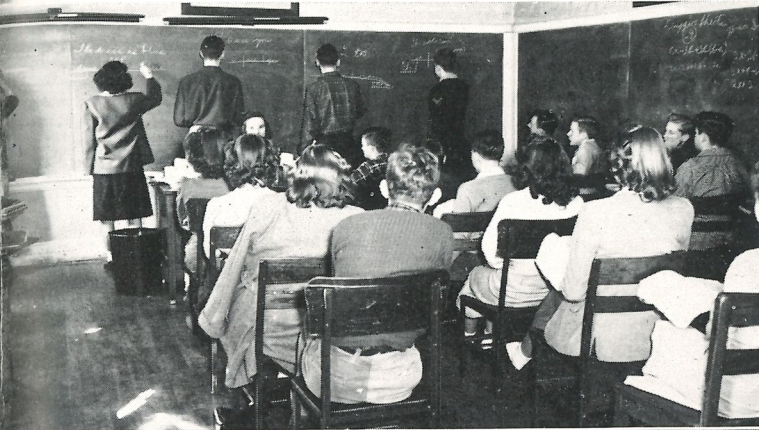

Vocational Education

This course proves to be a most interesting one as well as practical to all those who take it. It consists of mechanical drawing, shop, agriculture, and practical arts. All these subjects are most helpful in vocational guidance.

English Department

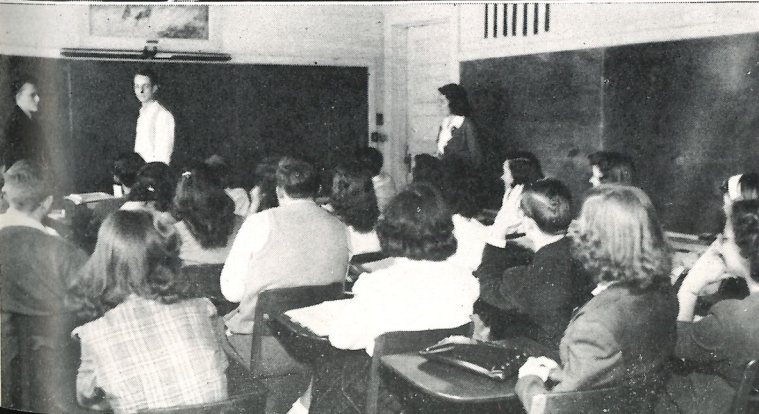

Since speaking activities constitute the greater part of our means of communications with others, it is only natural that they should make up the major portion of our high school curriculum. Mooresville's English department is composed of freshman, sophomore, and junior English and literature, also senior speech and English.

ENGLISH—The English classes spend most of their time in learning the principles of grammar and its correct usage.

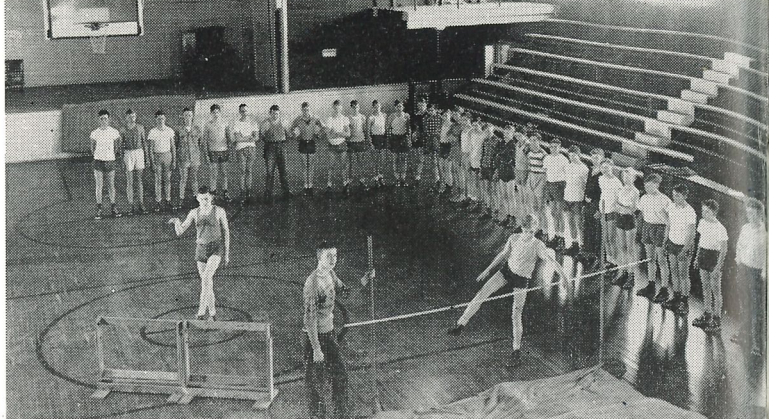

LATIN — These students are studying second year Latin which includes Julius Caesar. Mr. Smedley is their teacher.

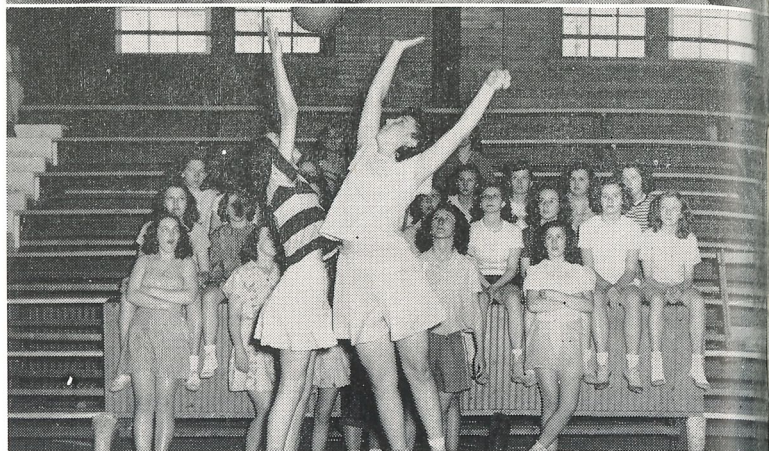

SPEECH — This course is offered during the senior year, and through its study we become better speakers and conversationalists.

PHYS. ED. — T h e boys' classes under the supervision of Mr. Van Liew and Mr. Potter spend most of their time on gymnastics, basketball, track, etc.

PHYS. ED. — T h e girls' department under the supervision of Mrs. Hassan shows that the boys aren't the only ones interested in sports.

HEALTH — The sophomore health class is divided into one semester of health and one of safety. Through this course we are able to maintain our physical fitness.

Physical Education

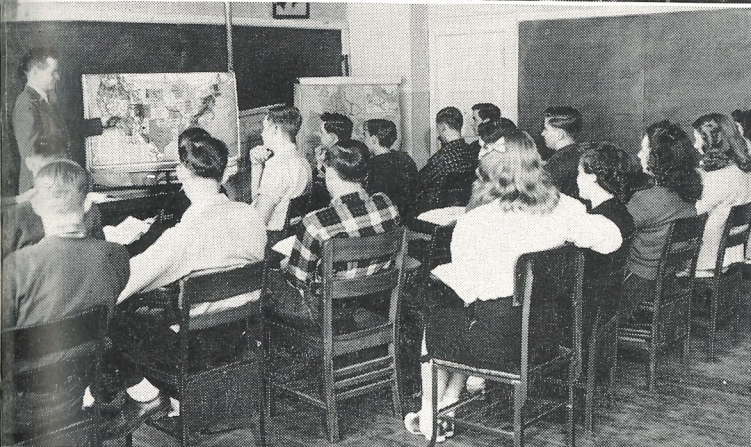

A healthy and strong body is a requisite for living happily. Boys and girls must be physically strong, as well as mentally fit, if they are going to help build a better world in which to live. Our physical education and health classes provide the basis upon which we build this physical fitness.

Social Studies

This course covers history, government, and sociology here at M.H.S., and is studied by some sophomores, all juniors, and all seniors. In learning of man's acts in the past, one is able to understand present-day situations more easily and clearly; and by studying sociology, one learns to analyze a situation and see why man has acted as he has.

CIVICS—This course which explains the workings of our Federal government is studied by the seniors. The second semester is devoted to sociology.

U. S. HISTORY—The juniors learn the historical background of OUR NATION in this class which is under the direction of Mr. Potter.

WORLD HISTORY—Ancient man and the activities in which he participated are discussed and studied in this class which consists mostly of sophomores.

HOME NURSING — The schedule for second year home economics includes home nursing and foods II.

HOME EC.—The first year consists of a study of foods, clothings, and social relationships.

ADVANCED H O M E EC.— The third year course is divided into courses in family relationships, housing, planning of home decoration, and advanced problems in clothing.

Home Economics

The home economics department under the leadership of Miss Sproat offers three years in one of the most interesting and practical courses in our school. The girls majoring in home economics gain useful information on how to become better homemakers and housewives.

Football

Something new has been added at M. H. S. in the field of sports this year. After a thirty-nine year absence, 1908 being the last year in which the school participated in this sport, the Pioneers once again have a football team. The backfield is ably tutored by John Van Liew, and the line coach is Wallace Potter.

Although it was the first year for the boys, the team showed power and balance, both in the backfield and in the line; and after losing the first two games, they bowled over four successive foes by decisive margins before succumbing to the Woodmen from Greenwood in the final conference tilt.

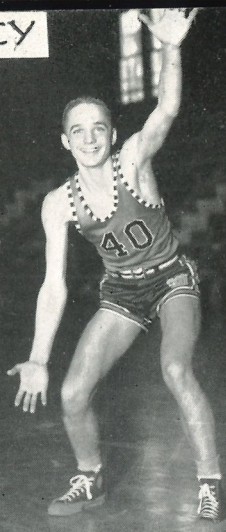

CONFERENCE STANDINGS

ALL-CONFERENCE TEAM

For the 1948 all-conference team for the Mid-state Conference two Mooreville players were elected for the varsity. They were Charles Quillen and Donald Shrake. Howard Percy, another member of the Pioneer varsity, was elected for the second team. Jack Mackenzie and David Lively received honorable mention.
